

NetworkIP Services Overview

Carrier Services

With a broad global network of **direct routes** to approximately 175 countries and **interconnections** to more than **100 carriers** - including all major U.S. **Tier Ones** - NetworkIP Carrier Services network is designed to deliver consistent **quality** and ultimate **reliability**. Our network also includes over 30 international **PTT's** and a substantial number of foreign **emerging competitive carriers**.

NetworkIP Carrier Services brings a full range of routing and termination **solutions** for international **voice traffic needs**. We carry over **2 billion** international minutes on our network annually, always with an adequate **price-quality ratio**, getting the most out of our service levels.

NetworkIP's network includes our state-of-the-art, **patented**, dynamic **quality assurance** routing tool – iQTechnology® (iQT). iQT ensures the best in call monitoring, management, quality and termination.

NetworkIP's **highly qualified** executive team supervises a fully **centralized** network with real-time network administration and **24/7 technical support**.

Our **robust voice network** helps our customers **grow** their businesses by helping them **strengthen** their own products; **facilitating** their internal business **operations** and helping them **achieve** new value-added products and services.
