

NetworkIP: Fast Facts

Leadership isn't claimed — it's earned.

Since 1998, NetworkIP has been changing the way businesses and people make, grow and enhance their connections. The company's category-leading prepaid platform services and stored-value products offer companies new ways to connect with their customers — and drive revenue.

NetworkIP offers the best combination of usage-based pricing, integrated prepaid services and features, quality and management controls. Bringing more than a superior platform to prepaid, NetworkIP leads with prepaid's best value.

Services:

Prepaid Platform
(Prepaid Calling Cards)

Prepaid Long Distance

Prepaid Conferencing

Prepaid VoIP

Customers:

NetworkIP supports a variety of voice and data customers, including major carriers, telecom service providers, distributors, resellers, CLECs, ILECs, ISPs, publishers, and more.

NetworkIP: Fast Facts

Innovations:

Integrated Communications Solutions (ICS 7.0): Our feature-rich Prepaid Services Network Platform provides real-time, Web-based tools allowing providers to access and control all of their operations including call routing, branding and profitability tracking via the Web.

iQTechnology[®] (iQT): An exclusive, patented tool that monitors and analyzes end-consumer experience in real time and automatically remove carrier routes that do not meet minimum quality. For prepaid distributors, the results are a higher percentage of successful calls, better call quality, and fewer trouble tickets.

Prepaid Toll-Free Technology: NetworkIP's patent-pending prepaid toll-free service — a suite of revolutionary communications tools — enables toll-free 800 numbers that can be forwarded to any number (wired or wireless).

Leadership:

NetworkIP's Management Team is comprised of prepaid, telecom and stored-value professionals:

Pete Pattullo: President and Chief Executive Officer

Toni Van Burkleo: Chief Financial Officer

Mike Truemner: Vice President of Prepaid & Tandem Services

Eric Graves: Vice President, Business Development

Trevor Baca: Vice President, Software Engineering

Locations:

Headquartered in Longview, TX, NetworkIP maintains additional offices in Dallas TX, Austin, TX, and Los Angeles, CA.
